Yes, I will work on this when I come back this afternoon from my errands  
Thuy  
P.S. I waved at you when I drove by Oxford last night 😊

Hey Thuy,

I was going to try to schedule time for us today to discuss the below and come up with a plan. BUT, turns out my calendar is pretty full. Can you talk to Yaorong and put together a draft one-pager on what we could do? I'm thinking it needs to cover the following:

- Remaining science questions (any others? maybe even prioritize these?)

- Options to answer the questions above
- Options for how states could help answer the questions

---

Ed and I were having a chat with CDPR and there was some discussion about them collaborating on some possible testing on the PFAS issue if possible. I think it would be good to think about how they could help. Let us know what kind of ideas you may have and we can arrange a time to meet with them. Thanks

Great, thanks for letting us know!

To follow up on the PFAS issue, there was a great deal of interest on this topic at our state agency meeting today. We would be interested in getting more information on what support you're looking for from state labs on the investigation moving forward. Do you have a tentative timeline for the investigation?

Best.  
Karen

Karen/Jesse

Just wanted to let you know the Grignard decision will not be going out until tomorrow morning. No issues - just timing. Did not want you thinking you missed it.  
Also I am checking with the AITC team on what if anything has been communicated to the registrant. Will let you know when I hear back.
